5. Upon further reconsideration of applicant's arguments and amendments to the claims, the Examiner is withdrawing the 35 U.S.C 102(b)/103(a) and 102(e) rejections of Wang (EP 0 310 216 A2) and Hsu et al (US 6,091,990), respectively, which were made against claims 22, 24, 33, 34, 36-38, 41, 42, 45, 48, 49, 52, 53, 55-57, 59, 65, 67, 75, 76, and 78 in the last Office action.

Authorization for this examiner's amendment was given in a telephone interview with Suneel Arora on March 15, 2006.

The application has been amended as follows:

- Claim 22, line 5, change the words "an instance" to the words "each instance",
- Claim 36, line 3, insert the word "individually" between the words "energy" and "associated",
- Claim 43, lines 2-3, change the words "the electrogram, the markers" to the words "an electrogram, markers",
- Claim 55, change the wording of the claim to read as follows:
"55. The method of claim 36, in which providing the alphanumeric indicator comprises displaying an alphanumeric indicator of pacing energy associated with each pulse.",
and
- Claim 56, line 1, change the words "the display includes" to the words "the act of displaying includes".

Allowable Subject Matter

7. Claims 22-48 and 50-80 are allowed.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The Bornzin et al (US 2002/0095190 A1) U.S Patent Application Publication discloses an implantable pacing device whose programmer appears to display voltage annotations associated with individual pacing pulses (Figs.3 and 4). Unfortunately, this reference does not constitute usable prior art due to its defective filing date.

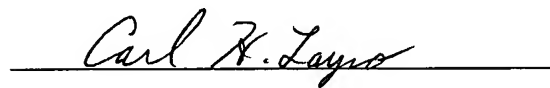

The Snell et al (US 5,724,985) patent describes a user interface for communicating with an implantable medical device. The interface includes display information showing and ECG waveform and, both atrial and ventricular pacing pulse energy information (i.e. pulse width and pulse amplitude values) in alphanumeric form. See Figs.4-6. Unlike applicant's claimed device, this device does not display alphanumeric energy annotations for each individual pace pulse.
